

IMPROVE YOUR PRODUCTION PROCESSES AND DISCOVER THE REAL POTENTIAL OF YOUR COMPANY

- ✓ With Smint OEE, measure your Overall Equipment Effectiveness (OEE) indicator in your production lines according to quality, performance, and availability for greater results.
- ✓ Know the performance of your machines, downtime and identify bottlenecks during production, allowing you to analyse real results from any device.

3 STEPS TO ACHIEVE SMART MANUFACTURING

1. ACQUIRE

Connect Smint OEE to your machines in order to acquire data through sensors or OPC solutions for asset management.

2. PROCESS

Measure your plant's productivity, synthesize the information and receive manufacturing metrics reports with Smint OEE

3. ANALYSE

Analyse charts and indicators as OEE to make effective and efficient decisions

Smint OEE

Increase your production in less time

BENEFIT OF Smint OEE

EASY SETUP

Easily add and customize your machines to view productivity reports and graphs

WIRELESS CONNECTION

Get data over wireless Connection

MULTIPLE PLATFORMS

Access your data from any browser (Chrome, Edge or Firefox) on your PC, tablet or other mobile devices.

DATA OF YOUR PLANT

Smint OEE transforms data into diagrams and graphs to help you analyse your production.

CLOUD STORAGE

Store your data securely in the cloud. No maintenance required. You can customize the storage size

24/7 ACCESS

Smint OEE will allow you to visualize the reports and status of your plant at any time and from any device. This will make it easier for you to monitor processes

After using Smint OEE for 3-4 months, customers report:

24%

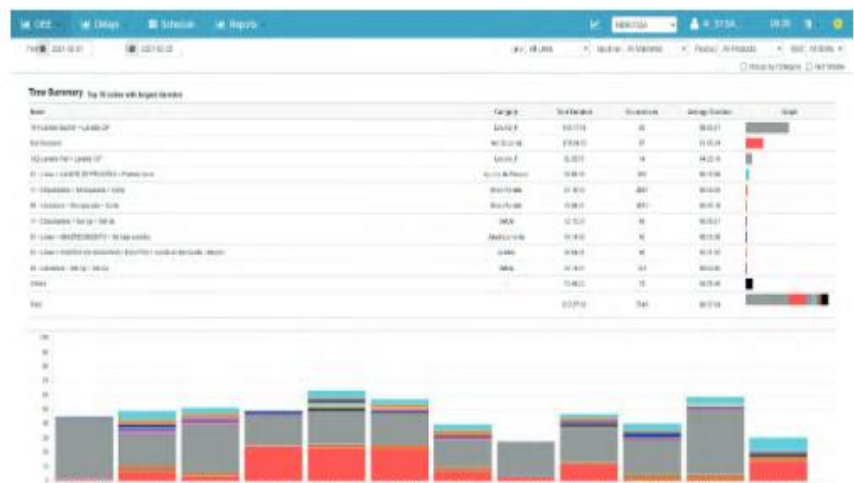

Increase in the total effectiveness of the equipment

16%

Decrease in the number of defective products.

10%

Increase in production capacity

NET OPERATING TIME

Identify the real time in which your machines were productive to increase the OEE rate of your plant

Reduce your carbon footprint and make a positive impact in your community.
